

IN THE SPECIFICATION

Please replace the Abstract with the following rewritten Abstract:

The invention relates to an illumination system ~~consisting of~~ including phosphore particles dispersed in a solid, durable matrix ~~while enabling it to~~ that can be handled by a user. The illumination system can be a transparent device or a light-scattering device.

Further, the illumination system can be applied in monolithic, laminated, single glazing or multiple glazing form.

~~The application for this illumination system is a transparent device or a light-scattering device, and in particular monolithic, laminated, single glazing or multiple glazing.~~
